## Icom Showcases M510 Family at International WorkBoat Show 2021

**KIRKLAND, Wash. (November 2021)** – Join Icom at the 2021 International WorkBoat Show in New Orleans from December 1<sup>st</sup> – 3<sup>rd</sup>, 2021, at the Morial Convention Center at booth 813. Icom will be showcasing our newest VHF marine transceiver, the M510. With the M510 onboard, conveniently command and control wirelessly, all from your smart device. When it comes to seeing the latest and greatest innovation for the commercial marine industry, the International WorkBoat Show is the place to be.

Icom's M510 VHF transceiver was designed to bring communication to life. This radio is a powerhouse formidable enough for the commercial market yet refined for the recreational boater. At almost half the depth of the M506, installation options are wide open. The 3.5-inch LCD color display provides a wide viewing angle for supreme readability, even in low light with night mode. Front and back connection ports allow an additional wired station using a COMMANDMIC™. Further connect up to three smart devices using the free RS-M500 iOS®/Android™ app. Add the optional CT-M500 interface box to gain NMEA2000™ connectivity and a two-way hailer/PA function.

The MA-510TR is Icom's latest Class A & B AIS transponder and provides ultimate safety at sea. AIS signals can reach where other radar cannot; Icom's new MA-510TR quickly spots a vessel hidden behind an island or another larger watercraft. This transponder is the perfect addition to any commercial, open-water leisure, fishing, or cruising application. The MA-510TR comes supplied with a GPS antenna.

See who and what's out there with Icom's M94D. For the first time, AIS is now available in a compact handheld marine radio. With an AIS receiver and DSC function, receive information broadcast by other AIS-equipped vessels and base stations. With the integrated AIS receiver, vessel traffic information is shown on the display, and the AIS target call function allows you to set up a DSC individual call easily. Distress calls are quickly made with the rear panel button.

AIR. LAND. SEA.

Produced by the same team as *WorkBoat Magazine* and *WorkBoat.com*, The International WorkBoat Show is a trade-only conference and expo for commercial vessel owners, operators, and builders, as well as vendors and suppliers that serve them. From exhibits to the Think Tank and even the unique nightlife of the Big Easy, it's your annual chance to network, shop, connect, and get in the know among the best in the business. It's a maritime industry tradition.

Icom is known the world over for manufacturing the most innovative land mobile radios. In a world where technology is ever-evolving, Icom continues to stand the test of time with leading-edge forward-thinking. Radio users worldwide choose Icom for its legendary durability, quality, dependability, and ease of use.
